Pec

secure-od@pec.it

- **Auto scaling and load balancing** features are suitable instruments if you need the maximum of flexibility.
- You can scale VMs up and down (adding/removing RAM, CPU and disk resources), and scale VMs out (by cloning the VM) according to configurable thresholds.

[Read more](#)

It gets

POTENTIALLY ENDLESS PERFORMANCE

- You can imagine a very large fishing net to which you can add further nodes saturating a Data Center, then spread out to another Data Center and so forth, till you need resources.
