What does SOD do for your company thanks to the NETWRIX service?

Identify

- Understands what data needs protection and how exposed it is, identifying, classifying and protecting it wherever it is;
- Find out what sensitive information is exposed to a large number of users without business need or stored in an unsecured location.

Protects

- Minimizes the risk of a data breach;
- Find out who is accessing sensitive data and how, allowing you to audit and remove unnecessary access, thus keeping risk low;
- Redacts sensitive information per company policy;
- It ensures data security by increasing the accuracy of your data loss prevention (DLP) tool.

Detect

- Timely addresses data security threats;
- Continuously monitor privileged user activity across all systems to ensure they follow internal policies;
- Closely monitor the activity of third-party user accounts on any system or application, even if it does not generate any logs, to ensure full accountability.

Respond

- It allows you to make faster and more targeted incident response decisions;
- It helps you understand exactly what happened, how it happened, who was behind it and what information was involved;
- Determine and report the severity of a data loss by analyzing how much data a malicious user or compromised account accessed.

Recover

- Facilitate recovery of key data and learn from past incidents;
- Understands the importance and sensitivity of data to plan information retrieval processes;
- Catalog your data and find out where the most sensitive or business-critical data is located;
- Restore data quickly by prioritizing recovery of key data

Respect

- Achieves and demonstrates regulatory compliance (GDPR, CCPA and other regulations);
- Implement compliance controls across your entire infrastructure and regularly check whether they are working as intended;
- Reduces time spent on preparation and compliance audits.

Why choose the Netwrix Auditor service?

01 Risk reduction

By promptly identifying and addressing potential vulnerabilities and breaches, the service helps companies reduce cybersecurity risks and potential negative consequences.

02 Complete visibility

It offers complete visibility into activities and events in your IT environment.

03 Safety

The service provides robust cybersecurity, quickly detecting and responding to threats and security incidents.

04 Compliance

It makes it easier to achieve and maintain compliance with company or industry regulations by simplifying the audit process.

05 Saving time and energy

It reduces your audit workload, allowing you to focus on other business-critical tasks.

06 Supporto professionale

Team of experts available to provide assistance and support 24 hours a day, 7 days a week.

07 Professional support

Fewer financial barriers to hiring qualified personnel.

Can the Netwrix Auditor service integrate with other defense and attack services?

The activation of the service as a complement to existing defense and attack systems helps to make the company's security more complete and resilient.

It goes perfectly alongside the solutions already in place to increase the overall security of the system by preventing the underlying problem.
